parallel session 3 - Lecture Hall 1.40 (14:00-15:45)

- Conveners: Santos, Rui

time	title	presenter
14:00	Dark Matter Signals at the LHC from a 3HDM	SOKOLOWSKA, Dorota
14:15	Generating hierarchies on the fermion masses in a 3HDM limit of the pSHUT model	MORAIS, Antonio
14:30	Extension of the Standard Model with a Doublet and a Complex Singlet and Heavy Vector Quarks	DARVISHI, Neda
14:45	Unified model of fermion masses with a Universal Texture Zero	DE MEDEIROS VARZIELAS, Ivo
15:00	Froggatt-Nielsen mechanism in a model with 331-gauge group	KOIVUNEN, Niko
15:15	Renormalisation-group improvement of multi-field effective potentials	SWIEZEWSKA, Bogumila
15:30	Off-shell renormalization of dimension 6 operators in Higgs effective field theories	QUADRI, Andrea
