

Harmonia Meeting III

Wednesday, 29 November 2017 from **09:30** to **20:00** (Europe/Warsaw)
at **Faculty of Physics (5.42)**
Pasteura 5, 02-093

Description This will be the 3rd HARMONIA Warsaw-Lisbon-Catania-Dresden meeting. Unfortunately, Maria Krawczyk, the real spiritus moves of our project, is no longer with us. To honor Maria's memory we want to continue our collaboration.

The one-day meeting will take place at the OCHOTA campus of the University of Warsaw (room 5.42) on November 29th 2017, preceding SCALARS 2017 conference (Nov.30-Dec.3.2017).

HARMONIA project "Investigation of extensions of the Standard Model including the effects of "new physics" up to the Planck scale and the current the LHC and astrophysical data" (2016-2019) is realized by four nodes:

- 1/ Faculty of Physics, University of Warsaw, Warsaw, Poland (leader J. Kalinowski)
- 2/ CFTC Faculdade de Ciencias da Universidade de Lisboa, Lisbon, Portugal (leader R. Santos)
- 3/ Dipartimento di Fisica e Astronomia - Universita di Catania, Italy (leader V. Branchina)
- 4/ Institut fuer Kern- und Teilchenphysik, Technische Universitaet Dresden, Germany, (leader D. Stoeckinger)

Participants Vincenzo Branchina; Gustavo C. Branco; Filippo Contino; Neda Darvishi ; Ivo de Medeiros Varzielas; Philip Diessner; Howard Haber; Igor Ivanov; Jan Kalinowski; Venus Keus; Wojciech Kotlarski; Krzysztof Meissner; Misiak Mikołaj; Per Osland; Ferreira Pedro; Margarida Nesbitt Rebelo; Krzysztof Rolbiecki; Rui Santos; Dorota Sokolowska; Dominik Stoeckinger; Bogumila Swiezewska

Registration Want to participate? [Apply here](#)

Wednesday, 29 November 2017

09:40 - 10:00	coffee/tea
10:00 - 13:00	presentations and general discussion
13:00 - 15:00	lunch ()
15:00 - 18:00	discussions in subgroups
18:30 - 20:00	dinner ()

Harmonia Project: (from 12.04.2016 for 36 months)
to carry out research in cooperation with foreign partners

Investigation of extensions of the Standard Model including the effects of "new physics" up to the Planck scale and the current the LHC and astrophysical data

Warsaw:

J. Kalinowski, K. Rolbiecki, D. Sokolowska, B. Swiezewska, A. Ilnicka, I. Ginzburg,
N. Darvishi, M. Misiak

Catania:

Vincenzo Branchina, Dario Zappala, Eloisa Bentivegna, Marc Sher,
Filippo Contino

Dresden:

Dominik Stoeckinger, Wojciech Kotlarski, Philip Diessner, Tania Robens,
Markus Bach, Hyejung Stoeckinger-Kim

Lisboa:

Rui Santos, Gustavo Branco, Raul Costa, Eduardo Dias, Pedro Ferreira,
Igor Ivanov, Gui Rebelo, Marco Sampaio, Joao da Silva, Ivo de Medeiros
Varzielas

Tasks:

1. Investigation of models with two scalar doublets in light of LHC data - search of heavy and very light scalars (W,C,D,L)
2. Analysis of the newest Dark Matter data in the Higgs-portal models (W,C,D,L)
3. Inclusion of loop corrections in processes with scalars (W,C,D,L)
4. Early Universe in non-supersymmetric models and vacuum stability (W,C,L)
5. Conditions of vacuum stability in models with doublets and singlets of SU(2) in flat and curved space-time (W,C,L)
6. Investigation of the electroweak/strong processes and Dark Matter in supersymmetric models with R symmetry (W,D)
